

# Carbon Smart Wood

Cambium's Carbon Smart Wood™ is made from wood that has been affected by disease, decay, disaster, and development. The company salvages this wood from local waste streams and upcycles it to create a carbon-negative material. The salvaged wood is processed into lumber for use in residential and commercial projects. Applications include decking, siding, fencing and millwork. Carbon Smart Wood™ contains 100% Biobased Content and has been awarded the USDA Certified Biobased Product Label in the BioPreferred® Program. The product is Red List Free.
