

# Biobased Xorel Wallcovering

Carnegie's Biobased Xorel - Strie is a wallcovering made from biobased polyethylene and polypropylene. The fibers are derived from sugarcane, a crop showing carbon sequestration abilities. The wallcoverings are not topically treated with perfluorinated chemicals or antimicrobials and have received C2C Material Health Platinum certification, SCS Indoor Advantage Gold, it has a DECLARE label and is Living Product Certified. Additionally, Carnegie offers a takeback program. The Strie wallcovering contains 89% Biobased Content and has been awarded the USDA Certified Biobased Product Label in the BioPreferred® Program.

Note: the CASNR does not distinguish between a petrochemical or biobased polyethylene and so will show the same number - the HPDC document helps you identify the source.

CATEGORY	MANUFACTURER
Wallpaper, Biobased	Carnegie

MATERIAL COMPOSITION\*

100% Xorel® (85% Biobased PE 15% PE)

*\*as reported by the manufacturer*

AVAILABLE SIZING

52" wide, sold by the yard
