

Clay Paints

Made of clays and natural pigments, BioShield Clay Paints can be applied to interior surfaces including masonry, gypsum, plasters, and previously painted surfaces. Clay Paints have moisture regulating and odor reducing properties and they provide optimum breathability. BioShield Clay Paints are matte, low-odor, non-toxic, no-VOC. They are free from acrylic copolymers, formaldehyde, ammonia, ethylene glycol, solvents or toxic heavy metals. The preservative, active ingredients of 1,2-Benzisothiazol-3(2H)-on and 2-Methyl-2H-isathiazol-3-on, is below EU regulation limits and is only in the product to prevent the production equipment from hosting bacteria.

CATEGORY	MANUFACTURER
Paint / Earth, Clay	Bioshield Paint

MATERIAL COMPOSITION*

Water, Clay, Porcelain Clay, Chalk, Alcohol Ester, Cellulose, Pigments, Preservative

**as reported by the manufacturer*

CERTIFICATIONS & DISCLOSURES
