

# Consolideck® LS/CS®

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Consolideck® LS/CS® is a penetrating silicate treatment for flat concrete surfaces. This treatment reacts with concrete to produce a calcium silicate hydrate inside of concrete pores. It works with freshly troweled concrete or existing floors of any age. LS/CS's ingredients are disclosed per HPD, DECLARE, RED List Free and comply with the US EPA's AIM VOC standards and CDPH air quality standards. Lithium Silicate is a component we are keeping an eye on as more research is released.

<b>CATEGORY</b>	<b>MANUFACTURER</b>
<b>Sealer/ Surface, Silicate</b>	<b>Prosoco</b>

**MATERIAL COMPOSITION\***

Water 85-90%, Lithium Silicate 3-20%, Potassium Siliconate 1-5%  
*\*as reported by the manufacturer*

**AVAILABLE SIZING**

1-gal, 5-gal, 55-gal, 265-gal

**CERTIFICATIONS & DISCLOSURES**
