

CorkonLinen

LEC

PRODUCT IN DEVELOPMENT

CorkonLinen is a plastic-free leather alternative. Cork contains a natural polymer called suberin which allows cork pieces to be bonded with heat and pressure only. Cork sourced from FSC-certified forests is hand-laid, sanded and backed by a linen fabric with a water-based glue. It is suitable for upholstery, accessories, and footwear.

CATEGORY

MANUFACTURER

Textile, Biobased RTFACT Brands

MATERIAL COMPOSITION*

70% linen, 30% cork, 1% water-based glue

**as reported by the manufacturer*
