

Corques Liquid Lino

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

LEC LOW-EMBODIED CARBON MATERIAL

Corques Liquid Lino offers a revolutionary way to use linoleum. An alternative to traditional rolls and tiles, this product from Duracryl International is sold as a liquid and poured onto a subfloor onsite. It sets overnight at ambient temperatures to create a seamless durable and natural looking resilient floor. Corques Liquid Lino is made from vegetable oil, cork, wood-flour, limestone, and natural color pigments. It is free of VOCs, PVC, plasticizers, formaldehyde, chlorine, and heavy metals. While the production of this product currently requires the use of isocyanates, the manufacturer avoids the more harmful toluene diisocyanate (TDI)

Per Duracryl's EPD, this product meets HML's criteria for low embodied carbon.

CATEGORY	MANUFACTURER
Resilient, Linoleum	Duracryl International

MATERIAL COMPOSITION*

Binder with MDI Activator: Castor Oil, Linseed Oil; Filler: Calcium Carbonate, Quercus Suber Bark; Pigment: C.I. Pigment Yellow 42, Dilon Trioxide, Iron Oxide (Fe3O4), Titanium Dioxide; Finish: Polyurethane
