

ECOBLOX

Colorado Earth makes unfired compressed earth blocks (CEB) and adobe bricks from clay and lime. The materials are sourced in Colorado from local quarries, by-products of the excavation operations, and are low-carbon masonry units. Earthen mortar and plasters can be made with the same compositions as CEB and adobe bricks for use with these products. This product has no Portland Cement content.

CATEGORY

Masonry, Compressed Earth Block

MANUFACTURER

Colorado Earth

MATERIAL COMPOSITION*

Sand, Clay, hydrated Lime

**as reported by the manufacturer*
