

Ecologic Waterglass

 A HEALTHIER AFFORDABLE BUILDING PRODUCT

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Ecologic™ Waterglass by Limeworks is a paint primer and masonry consolidant. Potassium silicate is used as a binder which can fortify concrete, cement, brick, stucco, rock, and lime plaster. It is vapor permeable, and can be used as a thinner for silicate dispersion paints. Note: Methyl Methacrylate is used at up to 10%. Current research is not conclusive. HML is continuing to watch this component.

CATEGORY

MANUFACTURER

Sealer/ Surface, Silicate **Limeworks**

MATERIAL COMPOSITION*

Water 50%, Liquid Potassium Silicate solution 25%, Methacrylate Dispersion 10%, Ammonia solution 1%, Sodium Phosphonate stabilizer 1%, Fatty Acid Defoamer 1%

**as reported by the manufacturer*
