

# Extra Organic Flax Wallpaper

Extra-Organic's flax wallpaper is made of 65% flax fibers and 35% viscose fibers. The product is Oeko-Tex certified. It can also be customized with embroidery of any color. It has excellent heat insulation properties and is tear resistant. It also has sound absorption and UV resistance performance qualities without additional petroleum-based coatings. The flax fibers are visible at the surface of the wallpaper. It is applied with a biobased glue that is pure methylcellulose which adds to the overall health and sustainability of the product.
