

# Food Container Packaging

LEC

PRODUCT IN DEVELOPMENT

Notpla creates food container packaging from cellulose with a coating of natural seaweed-based polymers. Their material is the first to be identified as "plastic-free" per EU Single-Use plastics directive standards, meaning it "does not require chemical modifications or petrol-based coatings to achieve grease and moisture resistance." It can be home composted or recycled.

CATEGORY	MANUFACTURER
Packaging, Algae	Notpla

## MATERIAL COMPOSITION\*

seaweed, cellulose

*\*as reported by the manufacturer*

## CERTIFICATIONS & DISCLOSURES

- ~~Health Product Declaration (HPD)~~
- ~~Declare Label~~
- ~~Environmental Product Declaration (EPD)~~
- ~~Safety Data Sheet (SDS)~~
- ~~USDA Certified Biobased Product Label~~
- ~~Other~~
