

GrowSquares

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

GrowSquares operates under a simple philosophy: don't put anything in your garden you wouldn't put in your body. This ethos resonates throughout their products and ensures every item they deliver is made up entirely of 100% organic materials, all specifically designed to improve the growth of their plants. Simply place your squares on your selected location and follow the app's personalized instructions as it guides you through the gardening process.

The mushroom-based scaffold is not only engineered to decompose, but it's biodegradation enriches both plants and soil by stimulating the development of microorganisms and improving soil moisture retention. The more you use GrowSquares, the better your soil becomes, as it allows for a greater variety of plants with each use.

CATEGORY

Garden Planter, Mycelium
