

Hempwood 3-Layer

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

HempWood is a hardwood alternative composed of hemp hurd and a soy based binder. Three layers of hempwood are cross-laminated as a countertop product. HempWood has a higher Janka rating than oak. It is a durable wood option, making use of carbon-sequestering hemp. All hemp for this product is grown locally in the U.S. and the entire supply chain is within a 100-mile radius of Murray, Kentucky. It contains 96% Biobased Content and has been awarded the USDA Certified Biobased Product Label in the BioPreferred® Program. HempWood products are available either with a factory finish (the manufacturer uses a Bona Finish) or unfinished. Refer to HML's Healthier Finishes collection for healthier wax or oil finish recommendations.
