

NeptuTherm

LEC

AVAILABLE IN THE EU

NeptuTherm is a loose-fill/blow-in insulation material made from Posidonia seagrass. Naturally found in the Mediterranean as felt-like balls on the shore, it achieves B2 fire classification and Class 1 mold resistance without additives.

Note: Sourced from the Mediterranean, transportation, and logistics contribute significantly to its CO2 emissions.

CATEGORY

Insulation / Fibrous, Cellulosic, Granular, Seagrass

MANUFACTURER

NeptuGmbH

MATERIAL COMPOSITION*

Posidonia seagrass

**as reported by the manufacturer*
