

Plexwood

Plexwood veneers are from virgin wood such as birch, oak, pine and beech. The veneers can be applied to substrates for planks/ tiles for flooring and panels for wall, ceiling and furniture applications. They use a water-based glue for application to the substrate with no formaldehyde or VOCs. Look for a substrate with a biobased binder such as from soy or lignin.

CATEGORY

Wall Panel, Wood Veneer

MANUFACTURER

Plexwood

MATERIAL COMPOSITION*

Wood (Veneer) 99%, Polyvinyl acetate 0.01%, Undisclosed 0.02%

**as reported by the manufacturer*
