

# Starphire Ultra-Clear®

Starphire Ultra-Clear® glass can be used in exterior and interior entrances, storefronts, and for safety and security applications. The product is partially made from cullet, scrap glass from the manufacturing process. Additionally, the glass product makes efforts to reduce embodied carbon and demonstrates a third-party-certified Global Warming Potential (GWP) 6% lower than the industry standard according to EPD. Starphire Ultra-Clear® has a Gold rating in C2C Material Health, with a Bronze rating overall. The material composition is Red List compliant.
