

Wood Panels

Urban Evolution offers wood panels for interior projects. The veneer and slate wall panels are LBC Red List Approved, to avoid isocyanates present in the resin of the MDF though, the solid wood panel systems should be preferred where possible. Solid slat wall planks, slat wood wall panels, and veneer panels may be ordered unfinished by request, allowing for finishing on-site using a product vetted by HML. See the Healthier Finishes Collection for options.
