PRODUCT IN DEVELOPMENT

LEC

AVAILABLE IN THE EU

Zeefier is a textile dye which is 100% made of red, green and brown seaweeds according to the manufacturer. The seaweed is sourced from food and cosmetic industry waste streams or collected from commercial beaches. The pigment is extracted from the seaweed and can be applied to natural fabric such as cotton, wool, linen or silk. Zeefier colors are available as a paste or a liquid for industrial use in dyehouses.
