

Thermally Modified Wood

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Arbor Wood Co.'s thermally modified wood is solid wood that is treated with only heat and steam. This impacts the cellular composition of the wood to remove moisture, hindering water absorption, and preventing mould, rot, and fungal decay. This process is done without any chemicals and the product is fully biodegradable. It can be used in exterior, interior, and decking applications. We recommend ordering without a finish and applying an alternative finish, options can be found in the Alternative Finishes Collection. Additionally, FSC-certified lumber is available upon request.

CATEGORY	MANUFACTURER
Dimensional Surface, Solid Wood	Arbor Wood Co.

MATERIAL COMPOSITION*

100% Solid Wood
**as reported by the manufacturer*

AVAILABLE SIZING

Planks in a few sizes based on wood and fastening style

COLORS

Comes in pine and ash in several color finishes
