

AZ Adobe Blocks

Arizona Adobe creates two types of bricks from local soils: puddled (a combination of earth and water mixed to a near mud consistency, sun-dried over 2-4 weeks) and pressed adobe bricks (a mix of soil and water condensed per hydraulic presses and machine automation, bricks emerge nearly dry). They come in standard and veneer sizes. All projects are provided a mortar with a matching composition. Custom and site-made bricks are available upon request.

CATEGORY	MANUFACTURER
Masonry, Adobe	Arizona Adobe

MATERIAL COMPOSITION*

Clay, Water, 8% Portland Cement

**as reported by the manufacturer*
