

# BioGrip Primer

Mineral paints, like this one, provide a great alternative to acrylic paints and primers. They are toxin-free, odorless, asthma-free, and naturally mold-resistant. BioGrip is Romabio's mineral primer. This primer is designed for interior and exterior use and works well on drywall, portland cement, cementitious siding, and stucco. In 2015, this product was verified by a third party to be free of the harmful ingredients on the International Living Future Institute's Red List. Titanium Dioxide is being used for pigmentation, the whiter the pigment, the more titanium dioxide.

Note: We will update the HPD once we received the renewed one. Manufacturer foresees early 2023 for renewal.
