

bioMASON

A HEALTHIER AFFORDABLE
BUILDING PRODUCT

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

bioMASON grows tiles using technology similar to hydroponics - units mixed with microorganism are fed an aqueous solution to harden the tiles to specification. bioMASON's process eliminates the need for firing by replacing the curing/hardening process with biologically controlled structural cement.

CATEGORY	MANUFACTURER
Pourables and Aggregates, Concrete	bioMASON

MATERIAL COMPOSITION*

Sand, *Sporosarcina pasteurii* (bacteria)

**as reported by the manufacturer*
