

Clayboard

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

Ampersand Art's clayboard is a healthy, sustainable option for model-making. This product is made of the company's 1/8" thick flat hardboard panel, also called Masonite, coated in a layer of kaolin clay. The hardboard is NAUF and is made with FSC certified wood. The clay finish is sanded to a very smooth surface, making it ideal for painting.
