

Clay Plasters

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

LEC LOW-EMBODIED CARBON MATERIAL

Clayworks clay plasters are blends of unfired clays mixed with natural minerals and pigments. They provide a 100% natural alternative for gypsum plaster and paint wall finishing. Clayworks clay plasters are non-toxic, avoid synthetic additives and emit zero VOCs or formaldehyde. They are free of heavy metals and can be composted.

The clay plasters help regulate indoor relative humidity and temperature, absorb toxics and odors, and are easily repaired. They are made in the UK and supplied in a dried form, ready to mix with water and apply with conventional plastering tools and skills. The BM-1 hazard on the HPD relates to respiratory protection. The clay plasters also contribute to WELL and LEED certifications.

Per Claywork's product-specific EPDs, this product meets HML's criteria for low embodied carbon.

CATEGORY	MANUFACTURER
Plaster, Lime	Clayworks

MATERIAL COMPOSITION*
Blended Sands, Kaolin, Other Proprietary Ingredients
**as reported by the manufacturer*
