

Compressed Agricultural Fiber Board

LEC

PRODUCT IN DEVELOPMENT

Compressed Agricultural Fiber Boards (CAF boards) are made with a patented mill technology for affordable, large scale straw assemblies. The straw is locally sourced with no added binders or adhesives. They use H-steel framing and obtain structural integrity from densely pressed straw. Note: 1% borate is to prohibit mildew.

CATEGORY

MANUFACTURER

Wall Panel, Straw Agriboard

MATERIAL COMPOSITION*

96% Agricultural Straw (wheat or rice), 3% Kraft paper, 1% Borate

**as reported by the manufacturer*

AVAILABLE SIZING

Span width can be 4ft.
