

# Fungi Force

LEC

AVAILABLE IN THE EU

Fungi Force is an exterior wood stain that is made of two components - a water-based stain with *Aureobasidium pullulans* fungi and a linseed oil finish. It has a transparent matte black appearance. This is a living organism and therefore, the linseed oil serves as food for the fungus and also keeps the moisture out of the wood. The fungus protects the wood against UV radiation and acts as a fungicide. It is recommended to regularly treat with linseed oil during the first year of use. After the first year, regular maintenance is recommended every 3 to 5 years and can be reapplied as needed if color fades.

The fungus classifies as non-pathogenic to humans.

Finished wood products are available under the brand [Xyhlo](#).
