

# Hempcrete Block

IsoHemp's hempcrete blocks are a non-load-bearing masonry product. These natural, healthy blocks are designed to be used for insulating envelopes, partition walls, and counter-partitions. Made only from hemp and lime, hempcrete's ability to diffuse accumulated heat makes it a fantastic thermal regulator. This product also regulates humidity due to its permeability and is naturally very fire-resistant, making toxic flame retardants obsolete. Not only are IsoHemp hempcrete blocks good for human health, they also have a positive environmental impact. Their manufacture requires very little energy, and they act as a carbon sink, actively absorbing CO2 from the air.

**CATEGORY**                      **MANUFACTURER**  
**Masonry, Hempcrete IsoHemp**

**MATERIAL COMPOSITION \***

Hemp (particle size of 2 to 20 mm) 80%, Hydraulic Lime 11%, Air Lime 9%

*\*As reported by manufacturer*

**AVAILABLE SIZING**

30 cm x 60 cm, available in 6, 9, 12, 15, 20, and 30 cm thicknesses

**CERTIFICATIONS & DISCLOSURES**

- ~~Health Product Declaration (HPD)~~
- ~~Declare Label~~
- ~~Environmental Product Declaration (EPD)~~
- ~~Safety Data Sheet (SDS)~~
- Other
