

HES-Mix

Hemp Ecosystem's HES-MIX is a 100% natural premixed hemplime. It can be used for non-load bearing wall construction, insulation as well as for flooring construction. Made from hemp hurd and hydrated lime, it has a lower carbon footprint than conventional wall-assemblies. It is naturally fire resistant, rot/pest resistant, and humidity regulating. The drying time is approximately 2 days. So called "HES-plus" which is natural minerals from crushed stone can speed up the dry time.

R-Value of the wall unit is 3.1/inch.

CATEGORY

MANUFACTURER

Masonry, Hempcrete **Hemp Eco Systems Group**

MATERIAL COMPOSITION*

93 - 98% high calcium hydrated lime, Hemp hurds, HESplus mineral binder and water

**as reported by the manufacturer*
