

Impressa

A HEALTHIER AFFORDABLE BUILDING PRODUCT

LOW-EMBODIED CARBON MATERIAL

Impressa has a natural base made from renewable raw materials very similar to linoleum. A state-of-the-art printing technique allows prints directly on the substrate for a range of authentic wood looks. The product composition is free from PVC, phthalates and styrene. Note: Aluminum Trihydrate is used as a fire retardant to exceed flame spread and smoke development for all international fire testing standards.

Per Forbo's product-specific EPDs, this flooring system meets HML's criteria for low embodied carbon.

CATEGORY

MANUFACTURER

Resilient, Linoleum Forbo Flooring Systems

MATERIAL COMPOSITION*

Linseed Oil 18%, Gum Rosin 2%, Tall Oil 9%, Aluminum Trihydrate 21.5%, Wood Flour 18%, Reused Marmoleum 16%, Calcium Carbonate 6%, Lacquer/Sealer 4.45%, Polyester 3.8%, Print Ink 0.95%

**as reported by the manufacturer*
