

## Impressa

AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

LOW-EMBODIED CARBON MATERIAL

Impressa has a natural base made from renewable raw materials very similar to linoleum. A state-of-the-art printing technique allows prints directly on the substrate for a range of authentic wood looks. The product composition is free from PVC, phthalates, and styrene. *Note: Aluminum Trihydrate is used as a fire retardant to exceed requirements for flame spread and smoke development by international fire testing standards. (see footnote)*

Per Forbo's product-specific EPDs, this flooring system meets HML's criteria for low embodied carbon.

### CATEGORY

**Resilient, Linoleum**

### MANUFACTURER

**Forbo Flooring Systems**

### MATERIAL COMPOSITION\*

Linseed Oil 18%, Gum Rosin 2%, Tall Oil 9%, Aluminum Trihydrate 21.5%, Wood Flour 18%, Reused Marmoleum 16%, Calcium Carbonate 6%, Lacquer/Sealer 4.45%, Polyester 3.8%, Print Ink 0.95%

*\*as reported by the manufacturer*

### AVAILABLE SIZING

39.4 in x 9.8 in x 0.1 in panels

### COLORS

Available in a variety of colors and designs

### CERTIFICATIONS & DISCLOSURES

- Health Product Declaration (HPD)
