

# Isomalt

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Isomalt is a product that is made by heating beet sugar, reducing it to disaccharide, then hydrogenating it using a catalytic converter. The end result is a sugar-like substance with lower levels of glucose than traditional sugar. Used most commonly in cake decorating, isomalt has the potential to replace resins or acrylic in model making.

CATEGORY	MANUFACTURER
Pourables and Aggregates, Sugar	Simi Cakes and Confections

## MATERIAL COMPOSITION\*

Beet sugar

*\*as reported by the manufacturer*

## AVAILABLE SIZING

6 ounces

## COLORS

Available in a range of colors
