

Muskin

 AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

LEC

 PRODUCT IN DEVELOPMENT

Muskin is a suede-like material from the fungi *Phellinus ellipsoideus*. It can be textile-backed or finished with a carnauba oil upon request. It is 100% biobased and compostable. According to the manufacturer, "It comes in different shapes and sizes and availability changes during the year. Limitations of size are not avoidable, due to its nature. One mushroom provides one Muskin, and no two are alike. Searching and providing natural, truly sustainable solution implies, foregoing large-scale processes and mindsets."
