

Natural Wooden Flooring

AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

LOW-EMBODIED CARBON MATERIAL

mafi is an Austrian company that specializes in the production of three-layer wooden planks that can be used as flooring, walls, or ceilings. mafi floors are finished using natural oils. Instead of creating a seal-like more typical lacquers, the oil soaks into the wood and protects it from the inside out. Because it does not create a barrier, the oil finish on mafi's wood floors allows the material to breathe and to help regulate the interior climate and improve indoor air quality. The natural oil finish is also free of toxic solvents. All of the wood used in mafi's flooring is grown in Austria, within 12km (8 miles) of the factory.

Per Mafi's product-specific EPDs, this product meets HML's criteria for low embodied carbon.

CATEGORY

Wood Flooring, Engineered Wood

MANUFACTURER

mafi

MATERIAL COMPOSITION*

Wood 99.9%, Polyvinyl Acetate Adhesive 0.05%, Natural Oils 0.05%

**as reported by the manufacturer*
