

Old World European Limewash

The USHG Old World European Limewash is a natural, non-toxic stain suitable for porous surfaces like bare wood, plaster, and masonry. The formulation of slaked lime putty allows it to penetrate deeply into underlying materials and fine substrates. As a result, once cured, the limewash creates a surface that won't peel, is breathable, and allows vapor permeation. The Limewash uses 100% natural pigments.

CATEGORY

Sealer / Surface, Lime

MANUFACTURER

US Heritage Group

MATERIAL COMPOSITION*

Silica Sand 50-75%, High Calcium Lime (Slaked Lime Putty) 10-40%, Water 50-75%, 100% natural pigments

**as reported by the manufacturer*
