

Paperfoam

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

Paperfoam is a packaging material made from starch, FSC-certified cellulose fibers, water and a proprietary pre-mix. It contains 88% biobased content, according to [Biopreferred.gov](https://www.biopreferred.gov). It can be recycled within the paper stream and is home compostable. As declared by the manufacturer, the material, including the pre-mix, is free from formaldehyde, solvents, PFAS, flame retardants, bisphenols, phthalates, and heavy metals. It can be injection moulded and embossed.
