

Polyblend Non-sanded Grout

The Polyblend Grouts are cement-based grouts for interior/exterior floors, countertops, walls, ceilings, and showers. Sold as dry components to be mixed with water on-site. Use the sanded grout option if applicable over the non-sanded as it has a lower content of Portland Cement. For natural stone and glass tile, use non-sanded grout (see product post).

CATEGORY	MANUFACTURER
Grout, Cementitious	Custom Building Products, Quikrete

MATERIAL COMPOSITION*

Portland Cement 40-70%, Calcium Carbonate 30-60%, Titanium Dioxide 3-7%,
