

BioConcrete

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

BioConcrete is a self-healing concrete product made of biodegradable plastic capsules of calcium lactate and bacteria added to a wet concrete mix. When activated by water, the capsules expand and fill any cracks that exist in the concrete.

CATEGORY

Pourables and Aggregates, Concrete

MANUFACTURER

Dr. Henk Jonkers

MATERIAL COMPOSITION*

Concrete, calcium lactate, bacillus bacteria, biodegradable plastic

**as reported by the manufacturer*
