

# Sheetrock Sheathing Gypsum Panels

LEC

LOW-EMBODIED CARBON MATERIAL

USG Sheetrock® Brand Gypsum Sheathing is a non-structural panel that can be used under many exterior surfaces in residential and commercial construction. The product is made of a moisture-resistant gypsum core encased in 100% recycled moisture-resistant paper on both sides and the long edges. The treated gypsum core allows water vapor to escape from stud space, protecting wood framing from moisture buildup.

**CATEGORY**

Drywall, Gypsum

**MANUFACTURER**

USG Sheetrock

**MATERIAL COMPOSITION\***

Calcium Sulfate Dihydrate and Cellulose

*\*as reported by the manufacturer*

**AVAILABLE SIZING**

48" x 98"

**COLORS**
