

Thermacork Standard Insulation

AVAILABLE AT THE DONGHIA
MATERIALS LIBRARY

Thermacork is a 100% natural, renewable, recyclable, and biodegradable rigid-insulation material produced from natural cork. Under the effect of pressure and superheated steam, cork granules expand and are agglomerated, originating blocks, avoiding any type of added adhesives. Cork forests benefit the environment, acting as habitats for a diverse range of species and providing a carbon sink that captures CO2 and greenhouse gases from the atmosphere.

Like most cork producers, Amorim Isolamentos, S.A. is based in Portugal. Thermacork's R-value is declared at 4/inch.

CATEGORY

Board Insulation, Cork

MANUFACTURER

Amorim Isolamentos

MATERIAL COMPOSITION*

100% cork (suberin, lignin and cellulose).

**as reported by the manufacturer*

AVAILABLE SIZING

8"x 39" Panel - Available in a variety of thicknesses

COLORS

Burnt Cork

CERTIFICATIONS & DISCLOSURES

- ~~Health Product Declaration (HPD)~~
