

Thermacork Decorative Panels

Thermacork's Decorative wallboard is made of 100% cork and can be designed and molded to any custom design. Under the effect of pressure and superheated steam, cork granules expand and are agglomerated avoiding any type of added adhesives. The product comes in 2"-2 3.4" thickness which gives it acoustic properties and allows it to work as thermal insulation as well. Cork is a 100% biodegradable material. The product installation is via an adhesive, please check with the manufacturer for a recommended healthier adhesive.
